

# Quilcene Weekly Update: 3.6.23

## Teaching & Learning

### Ideas for Using ChatGPT in Middle and High School Classes

By Geoff Richman, Edutopia

This week's article talks about how we, as educators, can use the power of emerging Artificial Intelligence (AI), such as ChatGPT, to benefit our students. For this, the author explains that this change might best be thought of in terms of how math teachers tackled the invention of calculators (which at the time people were very concerned could be the downfall of math education). They then go on to pose that ChatGPT could be very helpful in a number of areas including:

- Prompt Dissection
- Identifying which of multiple essays were designed by computers
- Comparing Multiple Readings

## Academic Recognition

*Congratulations to this week's Students of the Week, Shelly Winn and Jeremiah Satterlee! Jeremiah was nominated by Mrs. Hildebrandt for his work in preparation for the annual Wearable Arts show. Shelly was nominated by both Mrs. Leonard and Mr. Marr for jumping at every opportunity to engage in classroom discussions, attempt difficult questions, and ask for help when needed.*

## Upcoming...

|     |   |
|-----|---|
| 3/7 | MSGB vs Queen of Angels @ 4:00pm                      |
